Agreement with respect to the claims f) ☐ was reached. g) ☒ was not reached. h) ☐ N/A.

Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

The Applicant Representative discussed how the invention differed from Lawlor's system in which the user connects the portable device to a telephone line, stressing that the invention uses wireless technology and that there were a plurality of wireless access points within a given location, such as an airport terminal. The Examiner noted that this still seemed to read on cellular telephone systems and, although not referred to in the final rejection, the older car phone systems of the 1980's. After much discussion on ways in which the claims could be amended to overcome the rejection, no agreement was reached. The Applicant will attempt to amend the claims to better clarify the key features that the wireless access points are not cellular telephone antenna and, depending on what is disclosed in the specification, that the wireless access points "ping" the remote devices to identify them instead of the identification process being initiated by the remote device.

(A fuller description, if necessary, and a copy of the amendments which the examiner agreed would render the claims allowable, if available, must be attached. Also, where no copy of the amendments that would render the claims allowable is available, a summary thereof must be attached.)
